

ANIL KARACA

Data Journalist & Data Analyst

+90 554 656 01 50 · anilkaraca140@gmail.com · anilkaraca.com · [linkedin.com/in/anil-karaca](https://www.linkedin.com/in/anil-karaca) · github.com/arthlor · Available remotely worldwide | On-site: İzmir, Türkiye

Data journalist and analyst with experience in database design, ETL pipelines, data cleaning, and descriptive/diagnostic analytics. Skilled in SQL, Python, Pandas, and data visualization, transforming unstructured public records and product data into structured datasets, interactive dashboards, and clear visual explainers for decision-making.

CORE SKILLS

Data Analysis & BI: Python, Pandas, NumPy, SQL, PostgreSQL, Supabase, Geospatial Analysis (QGIS), ETL Pipelines, Database Schema Design, BI Tools (Tableau, Power BI), Excel

Data Visualization: Interactive Scrollytelling, D3.js, Plotly, React, Astro, SVG, Framer Motion, Interactive Dashboards, Geographic Maps

Journalism & Media: Investigative Reporting, Public Records, Election Data, Fact-Checking, Editorial Standards, Data Acquisition, Survey Methodology

Product & Web: Astro & MDX Content Systems, JavaScript, TypeScript, Tailwind CSS, Product Analytics, Agile Workflows, Git/GitHub

Languages: Turkish (Native), English (Professional)

Experience

Independent App Developer and Data Journalist 2025 - Present

Self-directed work | Remote

- Quantitative Research & Visualization: Shipped custom interactive graphics, scrollytelling stories, and exploratory analyses in React and Astro.
- Data Modeling & Operations: Analyzed product telemetry and database events for 4 self-launched consumer iOS applications, optimizing SQL query performance and data collection pathways.
- ETL Pipelines: Managed data parsing, cleansing, and storage pipelines using Python, SQL, and Supabase integrations.

Communications Advisor 2019 - 2024

İzmir Metropolitan Municipality & İZBETON | İzmir, Türkiye

- Data Modeling & ETL: Leveraged civic tech capabilities to design PostgreSQL database schemas and automate ETL pipelines for over 17,000 high-volume municipal transit and traffic-collision records, optimizing internal reporting and communication systems.
- Business Intelligence (BI) & Dashboards: Built interactive, self-serve dashboards and custom D3.js visualizations for municipal partners to support data-driven transit policy decisions.
- Descriptive & Diagnostic Reports: Converted raw datasets into clean visual assets, executive reports, and public-facing data-driven narratives.

Digital Journalist / Editor 2014 - 2019

BirGün | [dokuz8HABER](https://www.dokuz8haber.com) | Ege'de Sonsöz | Türkiye

- Exploratory Data Analysis (EDA): Conducted complex exploratory analysis on unstructured public records and election databases using advanced SQL queries (CTEs, joins, window functions) and Python; translated raw datasets into real-time tracking systems that supported national news coverage under tight deadlines.
- Real-Time Data Products: Engineered newsroom dashboards and live results trackers for high-stakes election broadcasts.
- Data Acquisition & Verification: Sourced, cleaned, and verified public records and survey data under deadline pressure.

Education

Kadir Has University – Master's Degree, New Media (2017 - 2019) · GPA 3.68/4.00

Focused on digital media, data analysis, and quantitative research methods.

Ege University – Bachelor's Degree, Journalism (2011 - 2015) · GPA 2.94/4.00

Completed an Erasmus exchange semester at the University of Lodz in 2014; GPA 3.75/4.00.
